7" DIGITAL COLOR TFT HANDS FREE MONITORS

With the new upgrade flat icon menu design, these hands free indoor monitors add up so many new functions, it can satisfy different needs for different users.

The LCD TFT monitor ensures quality chromatic performance under the color flat icon menu and the high-fidelity audio guarantees great acoustic performance in hands free.

The easy touch screen and touch sensor buttons make the operation more intuitive and convenient.

IMAGE QUAD SPLIT

This monitor can show four images at the same time when four CCTV cameras are connected to system via external module DT-QSW.

Such as Outdoor, Garage, Swimming pool, Baby room, you can control your home all the time.

Moreover, it allows to see each image individually, just touch the image you want to see, the image will be displayed on full screen mode. It makes your home more secure.

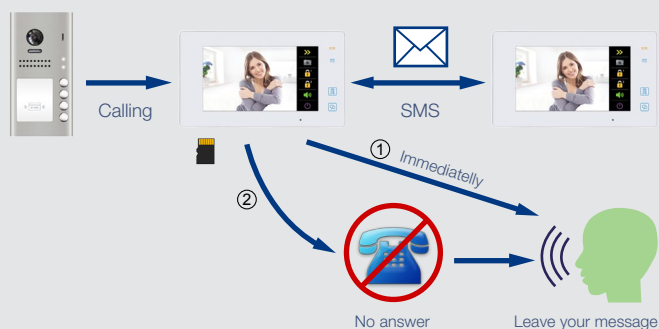

PANTILT & ZOOM IN/OUT

- Greater detail is just ONE PUSH away.
- Zoom in/out to identify everyone at the entrance.
- Pantilt to see individuals up close.
- * This function should make in effective with fisheye door station.

SMS & VOICE MESSAGE

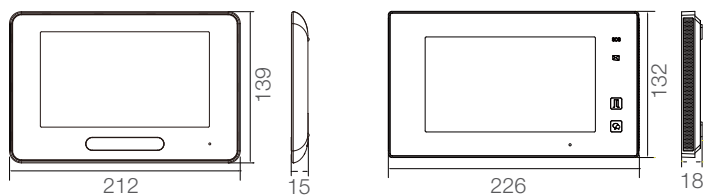

- It is available to send and receive free short messages among monitors, just touch the key, it's so easy.
- If you are out, you can set your monitor to home away mode, when someone visits your home, host and visitor can leave a message each other, controlling your entrance all the time.

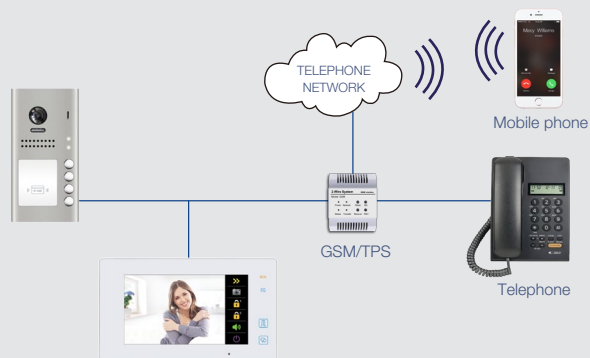

MOTION DETECTION

- Auto-recording when someone hovers in the doorway.
- Activate relay actuator(light on or unlock automatically).
- Alert announce when someone gets close.
- * This function should make in effective with motion detect function for door station.
