Screen

Main Menu

The Main menu is your starting point for using all the applications on your monitor. You can customize your Main menu to display your logo.

Touch anywhere of the screen on monitor in standby mode, the Main menu will appear as follow:

While talking with a door station

Answering a call

- When there is a call from a video door station. The call tone sounds, an image will be displayed on the screen.
- Touch (a) icon on screen or press (d) **TALK/MON** button on the panel, begin communicating hands free with the visitor for 90 seconds.
- While communicating with the visitor, unlock the door, capture images/videos and adjust screen&volume are available. More details, please refer to the following descriptions.

Note: If nobody answers the phone, the screen will be turned off automatically after 40 seconds.

Adjusting image scale while being called/talking

It's available to adjust image scale while being called. Total 2 image modes can be selected. Follow the steps:

-7-

Compare the difference of these 2 image modes:

To complete communication

• Touch $\[\]$ icon on screen or press the $\[\]$ TALK/MON button on the panel to complete the communication.

Note: Communication also ends automatically after 90 seconds.

1. Receiving a call while talking with a door station

- · Other door stations calling is forbidden
- · Conclude current talking to answer the new call-in

2. Receiving a call while talking with other monitors

- The talking will stop immediately, call tone sounds in normal.
- The video image from the door station is displayed on the screen, talking,unlock,capture images/videos, adjust screen&volume are available.

Adjusting screen&volume

While receiving a call from door station, or monitoring /communicating with the visitor, you can adjust the screen and speaker volume. Follow the steps:

Adjusting images

Total 4 scene modes can be selected in sequence: **Normal, Brightly, Soft and User**. Whichever mode you choose, there will be a corresponding value for contrast, brightness and color.

You should know that the contrast, brightness and color can be modified freely, but this action should be at the **User** scene mode.

Note: The adjustments have no effect on the recorded images.

Adjusting the speaker volume

Volume can be adjusted at any time.

Adjusting range: 0 - 9.

Touch - or + to reach desired level.

Door release

It is available to release the door during a call-in, communication, or while monitoring a door station.

Touch either 🛅 or 🛅 icon on the screen or press 🕞 UNLOCK button on panel to release door. The door lock is released for the set door release time.

(if two locks are connected to door station, touch 📆 icon to release the second lock.)

Calling other monitors

It is available to call between monitors in the same room or in the same system, or call the Guard Monitor. Follow the steps to activate the functions:

Calling monitors in the same room

Touch [Inner Call] icon on one of monitor, all other monitors in the same room will ring at the same time, whichever monitor answers the call, conversation is started, other monitors will stop ringing at once. (Calling ends automatically after 30 seconds if nobody answers the call)

- * Use " 4+ " or " 4- " to adjust the microphone volume.
- * Touch U icon to end the calling.

Calling other monitors in the same system

Touch **[Name list]** icon on monitor, the users in the same system will be displayed. Just select one target, touch icon to call the corresponding user. If the call is answered, conversation is activated.

Note:

- * Use " < " or " > " to scroll pages.
- * Touch " \(\bigcup \) " to redial when the icon is on the screen.
- * Calling ends automatically after 40 seconds if nobody answers the call.

Calling the guard monitor

A Monitor can be assigned as Guard Unit Monitor; when the Guard Unit Monitor answers the call, conversation with the guard person is started..

Monitoring

You can monitor the entrance at any time via the monitor.

- 1.Touch anywhere of the screen or press the (a) MENU button on the panel in standby mode.
- 2. Touch [MONITOR] icon on main menu page to enter Monitor select page.

*Note: Press (4) TALK/MON button on panel in standby mode to monitor the master door station in shortcut.

Monitoring door stations/cameras:

 DS1~4 and CAM1~4 can be selected to monitor individually if the system installs multi door stations/cameras. See the following steps:

- * During monitoring, images can be viewed, but audio cannot be heard.
- * If there is a visitor at the entrance, touch do icon on screen to begin communication with door station.

Opening staircase light

Note: The staircase light should be connected on the system, and this function should be supported by RLC. Please refer to RLC user instruction in detail.

Touch **[Light]** icon on main menu page or touch **[\infty]** icon during monitoring or talking to open the staircase light, the staircase light will be turned off automatically after 60 seconds.

^{*}Touch [Light] icon again to turn off the light.

Transferring call

The calling from door station can be diverted to your phone. please note that this function should be supported by the unit of TPC/GSM/TPS. Follow the steps to activate this function:

Set the divert number

Only one telephone numbers can be set, touch the telephone number frame, then input the number by touching the digital keypad.

^{*}Touch icon again to turn off the light.

Two modes can be selected.

Simultaneously: When receives call from door station, diverts the call to the phone immediately.

At this mode, the monitor will always open the screen and show image from door station during diverted, if the monitor answers the call at this time diverted will conclude at once.

2. If No Answer: If nobody answers the call in 30s when receives call from door station, diverts the call to the phone.

At this mode, the monitor will shut off the screen after diverting successfully, but you can still use it in normal.

Note:

- * The divert number should be set via monitor.
- * The time limited with the phone is 90s.
- * Touch Sicon on the screen to exit.

Monitor settings

You can set the quantity of door station and camera, monitor time at any time by following the procedure below.

- 1.On main menu page, touch Settings icon.
- 2.Select the item you want, then touch + / ,or < / > icon to change the value.

Note: Touch $\widehat{\ }$ icon to exit and return to main menu page.

Ring setting

The ring call tone can be set individually to distinguish different calling sources.

- 1.On main menu page, touch **Settings** icon -> **III** Ring.
- 2. Touch the setting target of door tone, intercom tone, door bell tone and ring volume individually, then touch (+)/(-), or (<)/(>) icon to change the value. Settings will perform immediately.

Note: Touch $\widehat{\parallel}$ icon to exit and return to main menu page.

Changing the display language

The default language can be customized. But you can change it to the language you need at any time. Follow the steps:

- On main menu page, touch **Settings** icon -> **M** Language..
- Touch desired language and select to save the setting.

*If the target language is not found in the window, touch \bigcirc / \bigcirc icon to scroll next page.

Restoring to default setting

The restore to default function allows the user to recover the settings to factory setting.

- · On main menu page, touch [Logo] icon to enter About page.
- Touch Cicon to restore to default.

Entering installer setup

- On main menu page, touch [Logo] icon to enter About page.
- · A keypad is shown.

Refer to the followings:

■ The setting items and codes are as followings

Code	Setting Item	Code	Setting Item	
2412	Reset To Default Setting	8016-8017	Bypass Enable/Disable	
2499	Restore Factory Settings		Unlock Time	
8000	00 Master Monitor		Video Display Standard	
8001~8003	~8003 Slave Monitor		Enable/Disable Intercom Call	
8006-8007 Setting Slave Monitor Panel On/Off		9017-9018	Scale Mode 4:3/16:9	
8010-8011	Unlock Mode:Close/Open			

■ Entering Address setting page

With a tool to Toggle one of the DIP to open Address Setting menu.

Refer to the followings:

Setting master/slave monitor

Maximum 4 monitors can be connected in one apartment, one master monitor together with 3 slave monitors, so you should set the address correctly.(Note:must have one monitor to be set as a master monitor)

Select Master/Slave Setting item,touch < / > /
icon to scroll to next item,settings will perform immediately.

Setting slave monitor panel on

In default mode, when receiving a call, the master and slave monitors will ring at the same time, and just the master monitor can display the image while the slave monitors will not. But the settings can be changed, you can set the master monitor and all the slave monitors to panel on at the same time when being called.

- Click "Slave Panel On When Being Called" item,when " ✓ " symbol is displayed in the frame ■, the setting is activated.
- Click the item again to cancel.

Setting user code

On DT system, every apartment must assign a unique identification called **User Code**.

There are two setting modes for address setting, DIP switcher and manual input.

DIP Switcher Set Address

The DIP switches are used to set the user code for each monitor. Total 6 bits can be configured.

- Bit-1 to Bit-5 are used for user code setting. The value range is from 0 to 31, which have 32 different codes for 32 apartments.
- When multi monitors need to be installed in one apartment, these monitors should use the same user code, and the master/slave mode should be set on the monitor. (Details refer to the section of Setting Slave Monitor)
- Bit-6 is bus line terminal switch, which should be set to "ON" if the monitor is at the end of bus line, otherwise be set to "OFF".

	Bit state	Setting	Bit state	Setting
		When monitor is not at the end of bus line.	ON DIP	When monitor is at the end of bus line.

This monitor is assigned with DIP setting instructions.

On Address setting page, select DIP Switcher Set Address setting mode firstly, then touch ••• icon, total 32 DIP codes will be displayed.

Manual Input Address

It's available to input the address manually for this monitor.

- Total 32 numbers to be set, from 00~31.
- When multi monitors need to be installed in one apartment, these monitors should use the same user code, and the master/slave mode should be set on the monitor. (Details refer to the section of Setting Slave Monitor)
- 1.On Address setting page, select Manual Input Address setting mode, then touch () icon, a keypad will be displayed.
- 2.Input the code by touching the digital number.
- 3. Touch "#" key to save, code setting complete.
- 4. Touch " x " key to delete.

Screen Calibration

- In standby mode, press (~) **UNLOCK** button on front panel and hold for 3 seconds.
- · Screen calibration menu is shown.
- Click "+" to complete the calibration.

Refer to the followings:

Specification

Power supply for indoor monitor:
DC 24V

Power consumption: Standby15mA; Working 400mA

Monitor screen: 7 Inch digital color LCD

Display Resolutions: 800*3(R, G, B) x 480 pixels

Video signal: 1Vp-p, 75Ω, CCIR standard

Wiring: 2 wires, non-polarity

Dimension: 125(H)×225(W)×23(D)mm
